JOINT REPORT OF THE VICE CHAIRMAN AND THE DIRECTOR June 30, 1962

The Honorable Jimmie H. Davis
Governor of the State of Louisiana
Baton Rouge, Louisiana

Dear Governor Davis:

The Vice-Chairman of the Board of Administrators of the Charity Hospital of Louisiana at New Orleans submits the following report of the activities of the hospital for the fiscal year July 1, 1961 through June 1962.

The following members continued to serve on the Board of Administrators:

Mr. Sam J. Arcuri
Mr. John W. Bowen
Dr. Willard A. Ellender
Dr. A. N. Houston
Mr. I. J. G. Janssen
Dr. M. O. Miller
Mr. Thomas C. Nugent

Mr. Sterling Robichaux
Dr. Rhodes Spedale
Mr. Louis E. Thomas, Jr.
Dr. Gilbert C. Tomskey
Mr. George Van Kuren
Dr. David J. Vial
Mr. Weldon Talley

Mr. John W. Bowen was re-elected Vice President of the Board of Administrators and Dr. Leo J. Kerne was reappointed Director.

The Members serving on the standing committees were as follows:

Finance Committee:

Mr. Irvin J. G. Janssen, Chairman

Dr. Rhodes Spedale
Mr. Weldon Talley

Mr. Thomas C. Nugent
Mr. John W. Bowen

Medical Committee:

A. N. Houston, M.D., Chairman
Dr. Gilbert C. Tomskey
Dr. Don L. Peterson
Dr. M. O. Miller

Dr. Rhodes J. Spedale
Dr. Willard A. Ellender
Dr. David J. Vial
Mr. John W. Bowen

House Committee:

L. E. Thomas, Jr., Chairman

Mr. Sam J. Arcuri
Mr. Sterling J. Robichaux
Mr. George Van Kuren

Mr. Thomas C. Nugent
Mr. David J. Vial
Mr. John W. Bowen

The cost of operations for the period July 1, 1961 to June 30, 1962, as compared with the same period last year increased \$442,289.25. The largest increase was \$391,720.26 in salaries. It is to be noted that for the first time drugs and surgical supplies decreased. The increase in food was nominal in comparison to the large increase of \$43,564.70 for the previous year. At the end of the fiscal year we had an unencumbered balance of \$5,243.14.

In addition to our regular appropriation, endowed funds contributed \$376,582.79 towards equipment.

ACKNOWLEDGEMENTS

The Sisters of Charity are to be commended for their unfailing interest, splendid cooperation and untiring labor. They have performed excellent services in this hospital in numerous capacities.

The Vice Chairman and the Director of the hospital wish to express their appreciation to the members of the Board of Administrators for the valuable services rendered in behalf of the hospital. The Department heads and the entire personnel of the Hospital have our deepest gratitude for their loyalty, devotion and wonderful cooperation.

Respectfully submitted,

JOHN W. BOWEN
Vice Chairman
Board of Administrators

LEO J. KERNE, M.D.
Director

COMMENTS ON OPERATIONS

June 30, 1962

The cost of operations for the period July 1, 1961 to June 30, 1962, as compared with the same period last year increased \$442,289.25 as per the following summary:

	1962	1961	Increase or Decrease*
Salaries	\$10,241,911.93	\$ 9,850,191.67	\$391,720.26
Food	980,202.16	965,921.84	14,280.32
Drug & Surgical Supplies	1,768,972.26	1,792,097.36	23,125.10*
Repairs Maintenance	258,165.86	248,312.67	9,853.19
Other Operating Expenses	1,441,840.02	1,392,279.44	49,560.58
Total Cost of Operations...	<u>\$14,691,092.23</u>	<u>\$14,248,802.98</u>	<u>\$442,289.25</u>

Cost of operations for the month of June, 1962, as compared with May, 1962 decreased \$63,418.62 as per the following summary:

	June	May	Increase or Decrease*
Salaries	\$ 845,532.79	\$ 850,203.24	\$ 4,670.45*
Food	84,631.30	80,890.82	3,740.48
Drug & Surgical Supplies.....	90,492.38	151,331.53	60,839.15*
Other Operating Expenses	80,244.00	66,516.53	13,727.47
Repairs & Maint.—Bldg. & Equip.	8,170.04	22,922.66	14,752.62*
Hospital Cont. to Retirement Plan & F. O. A. B.	44,362.42	44,986.77	624.35*
Total Cost of Operations ..	<u>\$ 1,153,432.93</u>	<u>\$ 1,216,851.55</u>	<u>\$ 63,418.62*</u>

COMPARATIVE

ANALYSIS—PERSONAL
SERVICE COST

Resident Physicians	\$ 44,123.53	\$ 44,355.37	\$ 231.84*
Internes	9,000.00	9,800.00	800.00*
All Other Staff Doctors	24,394.74	25,304.06	909.32*
	<u>\$ 77,518.27</u>	<u>\$ 79,459.43</u>	<u>\$1,941.16*</u>
Registered Nurses	\$103,021.08	\$106,024.52	\$3,003.44*
Practical Nurses	63,252.87	62,260.01	992.86
Nurse Aides	141,171.36	141,827.93	656.57*
Student Nurses	3,142.18	2,617.00	525.18
	<u>\$310,587.49</u>	<u>\$312,729.46</u>	<u>\$2,141.97*</u>
Other Personnel	\$453,227.03	\$453,814.35	\$ 587.32*
Sisters of Charity	3,000.00	3,000.00
Professional Services	1,200.00	1,200.00
	<u>\$845,532.79</u>	<u>\$850,203.24</u>	<u>\$4,670.45*</u>

By actual payroll count, 79 persons were employed and 125 released during the month of June for a net decrease of 46 per the following:

	June	May	Increase or Decrease*

PURCHASING DEPARTMENT

This is the report of the Purchasing Department for the year ending June 30, 1962.

At the close of the year the Department was operating with ten employees.

There were 19,741 purchase orders, purchase order changes and purchase order cancellations written during the twelve month period. This represents a decrease of 0.6% below the previous year.

There were several changes made in the interest of better purchasing for the Hospital.

Fourteen new categories of common and repetitively used items were included as contract items thereby eliminating the necessity of individual bids as the items were needed. These contract were based on a study of the nature of the items or commodities, the demands made by the using departments, the lead time, the stability of the price and the sources of supply. As of June 30, 1962 there were thirty eight Hospital contracts in effect. The pattern for these contracts was that established by the Division of Administration for common items used by all State agencies.

A standard for all Hospital garments in both sizes and colors was established in cooperation with Sister Clarisse thereby assuring uniformity and availability.

The buying cycle for laundry supplies was extended to a year to permit an annual analysis of competitive products as well as a degree of standardization which would not have been available had the items been purchased under the old quarterly cycle.

A catalog of all items by stock (excluding building maintenance) was prepared for distribution to all departments as an aid to withdraw from the warehouse under the machine accounting system. (Although the catalog was prepared it is still being printed). Certain items of common usage have been made available from stock rather than on an individual departmental request basis.

A record has been made of all office machines by make, model and serial number and cross-referenced department to enable us to quickly locate any unit for repair, maintenance or reference purposes. This had never been done before and it enabled us to save money on maintenance contracts on machines which were not being utilized.

Surplus commodities received from the Food Distribution Section of the State Department of Education were as follows:

Butter	32,000 lbs.
Dried	11,900 lbs.
Potatoes	15,000 lbs.
Rice	38,000 lbs.
Navy pea beans	600 lbs.
Cranberries	1,250 lbs.
Vegetable shortening	10,000 lbs.
Pinto beans	5,000 lbs.
Cheese	13,600 lbs.
Cornmeal	2,000 lbs.
Flour, hardwheat	40,000 lbs.

The market value of the commodities was \$37,372.00, a decrease of \$19,736.15 below the value of those received the previous year.

Very truly yours,

/s/ GEORGE A. SANDERSON, JR.
Purchasing Agent

PERSONNEL DEPARTMENT

Although this has been a year in which finances have been restricted, with the approval of the Board of Administrators, several advances have been made.

1. At our recommendation, the pay scales for Graduate Nurses I, II and III were raised throughout the State.
2. The employees of the Collaborative Child Development Program were brought under Civil Service with a minimum of disturbance in the routine of the Center.
3. A classification survey was made of all Graduate Nurse III and IV positions in the house. This resulted in several upward allocations of positions and, for the first time, in the establishment of Graduate Nurse V position in the Hospital.
4. Special entrance rates of pay were secured for Nursing Aides III in the Operating Rooms and for Dietitians II and III.
5. Twenty-four employees entered the armed forces and were placed on military leave in accordance with Civil Service regulations.
6. Thirty-four employees elected to retire under the provisions of the Louisiana State Employees' Retirement System Law.

Employees of the Hospital also came in for special honors during the year:

1. Mrs. Maude L. Bowen, Director of the Blood Donor Station, was one of nine recipients in the State of the Charles E. Dunbar, Jr. Career Service Award.
2. Five employees of the Hospital were awarded Outstanding Service Ratings in March. These employees are:

Mrs. Eddie V. Cooksey
Mrs. Marie Manich
Miss Bertha Nagel
Mrs. Josephine Parker
Mrs. Edney Tabor

This has been a year of austerity, but it has also been one in which we have enjoyed the complete cooperation and consideration of the Administration and of all members of the staff.

Respectfully submitted,

/s/ CHARLES C. STURTEVANT
Personnel Director

SISTERS' DIVISIONS

The Sisters' Divisions have undergone many trying times during the past fiscal year. The two largest of the divisions lost their leaders—the Dietary Department through the transfer of Sister Theresa to another field of service, and the Nursing Service Department through the illness and death of Sister Laurence. To date, neither of these positions have been filled, and the departments are operating as well as possible through their respective administrative staffs. It is hoped that new directors will be appointed in the near future. In addition, Sister Andrea was transferred from the Operating Rooms to another field of service, and she, too, has not been replaced.

The Charity Hospital School of Nursing, although still plagued by a high turnover among the teaching staff, put forth extraordinary effort this year to retain the national accreditation of the school. Their efforts were fruitful, and in June, the school director was notified that full accreditation had been granted by the National League for Nursing for the next six years. Some preliminary planning is now being done to determine the feasibility of shortening the three-year diploma program of the school by at least six months in the near future.

The Nursing Service Department was perhaps the most seriously affected of the departments in the Sisters' Divisions because of the death of its director, Sister Laurence, on April 1, 1962. Sister Laurence has been sorely missed by the department which is still without a director. Nursing salaries in general have been at a standstill for more than a year, and recruitment is becoming more difficult, but a small number of higher positions were reallocated upward with a resultant increase in salary. This will help to stabilize the supervisory staff, but the remaining nursing positions have made no headway during the past fiscal year. It has also become increasingly difficult to recruit trained practical nurses because of the higher salaries offered by other hospitals in the area. The continuing excellence of the inservice training program for professional and practical nurses has enabled the department to function as well as possible despite the limited staff.

The Housekeeping Department continued to function efficiently and well as in the past. In addition to the usual services offered by this department, a new fogging procedure was inaugurated for control of infectious bacteria, and this service is available upon request from any nursing supervisor. The Housekeeping Department is grateful for the new power sewing machines and other equipment received by the department during the year, but the need for additional supplies of linen is still urgent because of the linen shortages which occur when the Laundry is closed on holidays or has a breakdown of machinery.

The Dietary Department, without a director after the departure of Sister Theresa, was further handicapped during most of the fiscal year by a serious shortage of qualified dietitians on the staff. Unceasing effort by the director of the Sisters' Divisions resulted in the employment of an acting director on a temporary basis, and a number of dietitians were employed to supplement the depleted professional staff. The salaries of the administrative dietitians in the department were increased, and working conditions improved, with the result that the temporarily employed acting director decided to remain on the staff. Some additional equipment was purchased for the department to facilitate the work of the kitchen employees, and it is hoped that in the future, a modern cafeteria-type food service will be placed in operation for all hospital personnel.

The Sisters' Divisions wish to thank the administrative staff and the board of administrators of the hospital for the courtesy and cooperation extended during the past fiscal year, and to pledge our efforts toward the object of our mutual concern—better patient care for the lower income

citizens of Louisiana, and better facilities for the education and training of doctors, nurses, and other personnel concerned with the primary object for which the hospital exists, the preservation of human life.

Respectfully submitted,

/s/ SISTER MARGARET, F.A.C.H.A.

Central Service Workers	137
Clerical Personnel	81
Miscellaneous Personnel	80

The foregoing statistics are significant in that they reveal an increase in the professional nurse staff and a slight decrease in the practical nurse staff since the last annual report of the Nursing Service Department. They do not reflect the improvements in the nursing care of the patients which was evident in the nursing units during the past year. In accounting for this improvement, many factors must be considered, but the availability of professional nurses for employment and the lower patient census provided the needed stimulus toward the accomplishment of this goal. Fewer patients per nurse resulted in better working conditions and job satisfaction; salaries comparable to those paid in other hospitals in the city, provision for one month's maintenance within the hospital for the newly employed nurse, a parking lot for nurses' automobiles used as a means of transportation to work, and increased health benefits attracted professional nurses to the staff. During April, the professional nurse staff reached 320, the highest number in recent years. Well-planned staff education programs for both professional and practical nurses, and attendance at workshops, conferences and institutes provided opportunities for staff development and for the improvement of nursing practice.

The quality of nursing care provided to the patients was further improved through the work of active committees composed of representatives of the nursing service divisions and the school of nursing. The Nursing Records Committee revised three nursing records and the coordinated efforts of the committees on nursing policy and procedure resulted in the reconstruction and distribution of six nursing procedures. The committees on staff education for professional and practical nurses each presented nine monthly programs with a common aim, the improvement of supervision in the nursing service divisions. Upon recommendation of the representatives of three accrediting bodies who visited the hospital last year, i.e., the Joint Commission on Hospital Accreditations, the National League for Nursing and the Nursing Service Division of the Daughters of Charity at Normandy, Missouri, an Executive Committee of the Nursing Service Department was formed. Composed of the nursing supervisors and

the day assistant supervisors, this committee has held two meetings, and shows promise of attaining improvement in the nursing services through orientation, effective communications, and the dissemination of information which promotes good interdepartmental relations.

The in-service training program for practical nurses and nurse aides continued to function in highly effective manner, with 23 practical nurses and 70 nurse aides completing the respective training courses. This type of program is essential for effective work performance in an institution as large and complex as Charity Hospital. The Nursing Service Office staff participated in the educational programs of other hospital departments through formal classroom instruction of student nurses and operating room technicians, and by teaching routine nursing procedures to a class of 19 student technicians in the Diagnostic Radiology Department. Programs of orientation to Nursing Service were presented to the hospital's medical residents and interns, dietetic and medical technician interns, new faculty members of the schools of nursing and to the personnel in research programs.

The L. E. Rabouin Vocational School and the Booker T. Washington High School maintained affiliations with the Department of Nursing Service for the clinical experience of practical nurse students. A total of 92 students were enrolled in these programs. Of this number, 35 students are still enrolled for clinical experience, 10 L. E. Rabouin students completed four weeks in pediatric nursing and 47 Booker T. Washington students graduated upon completion of the nine-month clinical training period. Only fifty percent of these graduates accepted employment in the Nursing Service Department of Charity. This figure reflects a downward trend in the availability for employment of practical nurses who receive 75% of their nursing education through Charity Hospital. Up to this time the majority of the graduates, since the program was started in 1954, have accepted positions on the nursing service staff.

The Premature Infant Center reported a continued interest in the nursing service educational program for the care of premature infants. Individual and group needs of nursing personnel and students were met through planned periods of observation and demonstrations of procedures. A total of twenty-two professional nurses and one nurse aide benefited from this program. In addition, orientation and demonstration periods were held for 12 physicians from the graduate medical school of Tulane University, 110 professional nurse students and 38 practical nurse students. A brochure under the title, "Orientation Manual", has been compiled by the nursing staff in the Premature Infant Center and it is used as a guide in these educational programs.

The Personnel Health Clinic reported 8,216 patient visits for the year. Injections given for immunization to influenza, typhoid fever, poliomyelitis, tetanus and diphtheria number 2,871.

The nursing service staff participated in community health services and educational activities through representation in the New Orleans Hospital Council, Louisiana Heart Association, American Red Cross Nurse Enrollment and Disaster Committees, Volunteer Advisory Committee of the Charity Hospital Volunteer Service, Civil Defense programs, the American Nurses Association and the National League for Nursing.

Before concluding this report, we wish to express deep regret over the loss of the Director of Nursing Service who served so diligently for the past eight years. Sister Laurence passed away on April, 1962. She is sadly missed by the nurses and the nursing personnel in the Nursing Service Department.

Respectfully submitted,

/s/ SISTER MARGARET

Sister Margaret, Director

Sisters' Divisions and

Nursing Service Department

DIETARY DEPARTMENT

ACTIVITIES AND ACCOMPLISHMENTS

During the past year, there has been a re-evaluation of many of the policies and procedures in the Dietary Department. This has been possible recently because of a more complete staff of dietitians.

This report will cover the activities of the Dietary Department in the following order:

1. Main Kitchen and Storeroom
2. Patient Food Service
3. Formula Room
4. Personnel Food Service
5. Nutrition Clinic
6. Dietetic Internship Program

In the food production area including the Main Kitchen and Storeroom, a new week cycle of menus to cover each of the four seasons was instituted. Adaptation can be made due to unavailability, sudden price increases, or unacceptability. Ordering has been adjusted and facilitated through the use of the cycle menus.

During the past year, the amount and variety of foods supplies requisitioned for Dr. Grace Goldsmith's metabolic patients has increased considerably.

It has been necessary for the Storeroom to receive Formula Room supplies because at present there is inadequate storeroom space on the 10th Floor.

All employees are checked in and out by the Dietitian or person relieving her.

New equipment added to the food production area includes the following.

1. A new Infra Red Broiler on the personnel side of the Main Kitchen. This cuts our cooking time of broiled items in half.
2. A 15 gallon Coffee Urn on the personnel side of Main Kitchen.
3. A 100 gallon Coffee Urn on the patients' side of the Main Kitchen. This enables us to make coffee only twice for the entire patient census.
4. Twenty-four new food Conveyors. This provides one or more food conveyors on each floor and outside buildings, with three extra for emergencies. These conveyors have proved to be a tremendous improvement over our previous ones. The food is kept at a hotter temperature, and arrives in better physical condition since flat pans are used instead of deep wells, and the conveyor design enables the floor Dietitians to serve more efficiently.
5. Proof Box in Bakery, which provides better temperature and humidity control for bakery products.
6. Electric Can Openers for both sides of the Main Kitchen, Bakery, and Vegetable Room. These can openers are much faster than the manual ones used previously.

Two assistant Administrative Dietitians are now employed in the food production area, and are responsible to the Administrative Dietitian. This provides better management supervision.

Comparative figures of meals served are as follows:

	1960-1961	1961-1962
Patient Meals	2,191,863	1,983,180
Personnel Meals	1,072,826	1,091,768
Total Meals	3,264,689	3,074,948
Special Meals Served	173,881	186,203
Infant Formulae Prepared	120,767	125,751

Comparative figures of meal costs are as follows:

	1960-1961	1961-1962
Food	\$ 975,921.94	980,307.07
Salaries	529,187.00	544,934.08
Other Expenses	86,806.25	92,818.93
Formula Room Food	13,898.65	22,547.52
Total	\$1,605,813.84	1,640,607.60
Donated Food	\$ 25,550.27	28,579.05

Patient food service in all areas has been improved as a result of the new hot food conveyors and the cooperative effort of Dietary and Nursing personnel. The method of service is adapted to each floor or building.

A new five week rotating schedule was introduced and is now in use for all pantry employees.

All food service employees on the floor pantries and in the outside units are being checked in and out by a Dietitian.

The procedure for cleaning trays was changed to include passage of trays through the dishwashing machine after each use.

New major equipment used in patient food service included the following:

1. Dishwashing machines on the 3rd, 7th, 9th and 10th Floor Pantries of the Main building and also in the kitchens of Polio and Isolation buildings.
2. One small fan was installed in the 4th Floor Pantry.

Routine repairs were made on both large and small old equipment.

Four of the pantries—7th, 8th, 9th and 10th Floors, and the Formula Room were painted.

Teen-age Red Cross Volunteer Workers assisted in doing some of the routine tasks in some of the floor pantries and in delivering trays to the patients during the summer months.

Four Therapeutic Dietitians were hired for the Floors, providing considerably better checking of diets and employees. There is still one vacancy for a Therapeutic Dietitian.

Two hundred and fifty Freshmen, Junior and Senior Student Nurses were assigned to Medical, Surgical and Pediatric Diet Kitchens for one week. They are orientated, supervised, followed up and evaluated by the Therapeutic Supervising Dietitians.

The Formula Room on the 10th Floor now stores their supplies in the Main Dietary Storeroom in the basement, and requisitions from these supplies three times a week. This was initiated as a temporary measure due to an inadequate storage set-up in the Formula Room area.

New equipment obtained during the past year includes:

1. 1 Autoclave Cart
2. 1 Aluminum Ladder
3. 2 Stainless Steel Pitchers
4. 12 Dollies
5. 4 Milk Buckets
6. 16 Plastic Containers
7. 3 Stainless Steel Pourers
8. Bottle Racks
9. 4 Nipple Baskets

In the Student Nurses' Residence, new equipment installed included the following:

1. A new Toaster in the Cafeteria
2. Two new Exhaust Fans in the dishwashing unit.

The three walk-in refrigerators in the Kitchen were renovated.

The Dietitian in the Nurses' Residence was relieved of the responsibility of acting as consultant for the Outside Buildings since a Dietitian was hired to be in charge of the food service in these units. This Dietitian is directly responsible to the Therapeutic Administrator in charge of the patient food service.

In Nutrition Clinic a total of 20,905 patients were seen and instructed on special diets. Of these new reductions diets totaled 1,457 and reduction revisits totaled 2,878.

The number of diabetics instructed individually and reviewed on their diets was 4,153. Besides the individual diabetic instructions, 311 patients and attendants attended diabetic class where supplementary instruction is given weekly.

Various other special diet instructions, which include the following diets and variations: Normal, Soft, Tube Feeding, High Caloric, High Protein, Low Protein, High Residue, Milk and Cream, Bland, Colostomy, Dumping Syndrome, Low Calcium, Low Cholesterol, Low Fat, Low Saturated Fat, Low Purine, Low Sodium, Kempner Rice and Gluten Free, totaled 1,064. Revisits for the above diets totaled 1,920.

Obstetric Clinic referred 9,122 pregnant women for diets:

- 6,976 were instructed on normal diets
- 780 were instructed on toxemia diets
- 1,337 were instructed on toxemia reduction diets
- 29 were instructed on reduction diets

Total broken appointments for follow-up instructions were 2,116.

Sixteen Dietetic Interns rotated through Nutrition Clinic. Each was assigned for a period of 4 weeks, two days of which were spent with a City Public Health Nurse visiting patients and attending Well Baby Clinic.

Ninety Student Nurses rotated through Nutrition Clinic. Each was assigned for a period of one week.

As a new feature this year movies on diabetes and pregnancy diets were shown to the diabetic and OB class respectively. This was done three times and proved to be not only enjoyable to the patients, but a very satisfactory learning experience.

Now that the Nutrition Clinic is staffed with two Dietitians, more thorough instructions can be given to patients.

Under the Dietetic Internship Program, eight completed their Intern-

ship on August 31, 1961 and five on January 31, 1962, making a total of 208 since the inception of the course in 1944.

The rotation of services remained essentially the same, as did the formal class program. As previously, each intern prepares and presents a yearly project which is kept on file in the office of the Director of the Dietary Department.

Ten field trips were made to selected places outside Charity Hospital.

Four Dietetic Interns attended and reported on the Louisiana Dietetic Association Convention and the Louisiana Restaurant Convention held in Shreveport, Louisiana. One Dietetic Intern attended the American Dietetic Association Convention in St. Louis, Missouri, with Sister Theresa, the Director of the Dietary Department.

All Dietetic Interns and several of the Dietitians attended the Southeastern Hospital Conference for Dietitians held in New Orleans.

The practice of abstracting from the Journals of Pediatrics, Psychiatry, Geriatrics, Obstetrics and Gynecology, and Gastroenterology, for the Journal of the American Dietetic Association was continued again this year.

Public Relations and Career Guidance activities were again stressed..

1. A Career Day talk to High School Students.

2. Tours were conducted for the following special groups:

- a. Tour of Dietary Department for Dietitians attending the Southeastern Hospital Conference, included Miss Edith Jones, President of the American Dietetic Association, and Miss Helen Jenkins, President of the Southeastern Hospital Conference of Dietitians.
- b. Tour of Dietary Department for all attending Institute for Colored Food Service Supervisors (total 31) sponsored by Louisiana Hospital Association and the Louisiana Dietetic Association.
- c. Periodic tours for Charity Hospital Student Nurses, Student Practical Nurses, and Student Medical Technicians were also conducted.

In December, two representatives from the American Dietetic Association visited the Dietary Department. On their recommendations conditional approval was given to our Dietetic Internship Program. Primary reasons for conditional approval were the limited number of staff dietitians and the resulting lack of supervision and experience in all areas. Quarterly reports have been sent to the American Dietetic Association as requested. Every effort has been made to comply with the recommendations made.

RECOMMENDATIONS

Recommendations are as follows:

1. Better ventilation of Kitchen, Floor Pantries, and Colored Employees' Dining Room.
2. Re-evaluation, formation, notification and rigid enforcement of policies regarding food service for personnel and patients.
3. An audit of cooks' classification regarding status and salary, in order to produce higher quality food. It is believed that the cooks' salary range is lower than average in this area.
4. A storeroom for Formula Room supplies on the 10th Floor near the formula preparation area.

5. Purchase of suitable carts, preferably stainless steel, for setting up and transporting patient trays to unit where the hot food is served.
6. Conveyors, preferably closed, for transporting dishes (dinner plates, bowls, vegetable dishes) which are needed for serving hot food on the units.

APPRECIATION

Our sincere gratitude is extended to the Director and his Assistants, the Board of Administrators, The Sisters, the Medical and Nursing Staffs, Engineering and Maintenance Departments, Purchasing and Personnel Departments, and all other Departments of the Hospital, who have given us their assistance and cooperation this past year.

Respectfully submitted,

/s/ MARTHA L. BUTTROSS

Acting Director
Dietary Department

HOUSEKEEPING DEPARTMENT

The turnover of personnel in this department was 86; 65 resignations and 21 removals. Five employees were promoted to higher classifications; and two were transferred to other departments with promotion.

Two Custodial Workers II positions were abolished with a view toward establishing a floor maintenance supervisory position on a higher level. The final approval of this new classification is still pending.

Three hundred twenty-five mattresses were renovated, and thirty-four new mattresses were purchased.

The work of window cleaning was satisfactorily done by the National Window Cleaning Company as per contract. Pest control service has been continued by the Charity Hospital Pest control workers.

The procedure of fogging for control of infectious bacteria was started this year, and this service is now available upon request for any area where it is deemed necessary.

The following supply of linen replacements were made:

4,437 Bed Sheets	3 RX table pads
3,544 Roller and RX table sheets	545 Mattress covers, plastic
480 Crib sheets	18 Crib mattress covers
300 Bassinet sheets	23 Plastic pillow covers
144 Draw sheets, 7th fl.	62 Equipment covers, plastic
648 Bedspreads	45 Roller pads covered
6,694 Pillow cases	3 RX table pads covered
555 Blankets	915 Aprons
2,630 Receiving blankets	2,941 Doctors caps
200 Crib blankets	474 Operating gowns
170 Pillows	1,644 Doctors scrub shirts
7,666 Patient gowns	1,170 Doctors scrub trousers
1,800 Pajamas	1,163 Nurses first gowns
924 Robes	370 Nurses 2nd gowns
18,056 Diapers, Birdseye	48 Grey nurse aid gowns
73 cs Disposable diapers (400 per cs)	312 Smocks, reversible front
20 cs Disposable diapers (600 per cs)	442 Professional arm bands
8 cs Disposable diapers (576 per cs)	858 Arm board covers
1,772 Large pads	36 Bassinet shields
1,918 Bassinet pads	60 Blood pressure cuffs
10 cs Disposable pads (300 per cs)	144 Triangular bandages
6,000 Bath towels	108 Basket liners
5,588 Huck towels	240 GU bags
2,338 Kitchen towels	768 Tesa tube bags & bottle covers
13,036 Surgical towels	60 Bed pan covers
5,225 Wash cloths, terry	240 T Binders
53 cs Disposable wash cloths (500 cs)	216 Thomas splints
7,998 Sterile wraps	100 Leggings
240 Slit sheets	1,222 Restraints
89 Tablecloths	230 Scuffs
240 Napkins	95 Stretcher pads
156 Coffee bags	176 Spring Covers
22 Roller pads	

The supply of linen for the Central Linen Section should be increased to the amount of one day's supply. This will relieve the shortage which presently exists when the Laundry closes on a holiday or has a breakdown of machines.

Six new Singer power sewing machines, self lubricating, were installed in the Main sewing section. Six additional new machines are needed and will be requested when the hospital budget permits.

We are grateful for the support and consideration given to the Housekeeping Department and Linen Section by the Board of Administrators, Doctor L. J. Kerne, M.D., and the Administrative Staff during the past year.

Respectfully submitted

/s/ SISTER CLARISSE

Director of Housekeeping

SCHOOL OF NURSING

ACCREDITATION

The School of Nursing had its resurvey for continued accreditation by the National League for Nursing the week of February 26, 1962. Accreditation has been continued for a six year period with an interim report required for December, 1965; a re-visit for continued accreditation will be made in 1968. The State Accreditation visit is scheduled for July 12, 1962.

EDUCATIONAL PERSONNEL

There were seventeen resignations and twelve replacements in the teaching personnel for the current year. The percentage of turnover according to education and preparation was as follows:

Instructor I (R.N.)	100%
(6 positions)	
Instructor II (R.N. plus B.S.)	45%
(22 positions)	
Instructor III (R.N. plus M.S.)	20%
(5 positions)	

This seems to indicate a need to reclassify the Instructor I positions.

Recognizing the need for a better qualified teaching staff, our staff education was devoted to teacher improvement. The program included a series of five lecture demonstrations on Communication Skills by a Clinical Psychologist, the Instructors' Course in American Red Cross First Aid, and a four-day Workshop on Mass Casualty Disaster Nursing. Four instructors attended a two-week Workshop at DePaul on Behavioral Concepts in Basic Curriculum, one attended a Workshop Team Leading Techniques at Louisiana State University, one, a two-week Workshop on Perspectives in Nursing at the Catholic University of America, and one, a one-week Workshop on Maternal and Child Care at Duke University.

STUDENT WELFARE

Residence. The total number of residents is 397. Of these, 340 are student nurses, 268 Charity and 72 Affiliates, 53 Anesthesia students, and four staff members.

The exterior of the building is in the process of being waterproofed, the interior from second through thirteenth floors is in need of plastering, painting, new flooring, and new furniture.

Improvements include new blinds and draperies in the lounge, fifty new chairs for television room on 14th floor, laundryette with two washing machines and one dryer located in the basement, line-o-tile floor covering for recreational room in basement, and three domestic refrigerators for dinettes.

AFFILIATIONS

The school of nursing has maintained affiliations in several of the clinical areas with schools in both Louisiana and neighboring states. The number of schools gradually decreased to 9 schools from 15 states. The administration approved discontinuing affiliations with all out-of-state schools, to be effective as soon as the schools could make plans. This step was taken because of the increased enrollment in our own school and the inability to recruit teachers. By December, 1962 it is hoped that all

out of state schools will have completed their affiliations with Charity Hospital.

CURRICULUM

The curriculum plan of the School of Nursing now requires three calendar years. Each year is divided into four twelve-week blocks of instruction and practice (or, during the initial two term of instruction only), and one four-week term of vacation.

Within this framework, the Faculty have consistently sought to improve the content and methods of instruction. Ongoing and annual evaluations of the curriculum have been employed to identify students' personal and professional needs, and the goals to be attained. Goals thus set and attained during the past year include: amplification of the philosophy and revision of school and curriculum objectives; increased utilization of outpatient department for related experiences in the major nursing courses; improved library resources on clinical units; and increased emphasis on family-care study in the nursing of children.

The major goal of the faculty is to provide a course of instruction that will enable the student to identify and meet the nursing needs of patients—this means a patient-centered curriculum. During the coming year the faculty plan to study instructional content from the standpoint of the essential learning experiences in each of the five clinical areas of the curriculum.

If these can be identified, we would then be in a position to determine whether or not it is advisable to shorten the three-year framework within which we function. We want to accomplish this in a very thorough manner because there is strong belief among many of our faculty members that the hospital diploma program is more realistic than the two-year program in its preparation of the student function in the practical situations she will encounter as a graduate. In order to accomplish the study of our curriculum, we recommend—that provision be made for expert counseling and assistance to the Faculty to organize and carry on the project of identification of essential learning experiences in the clinical area.

RECRUITMENT AND FINANCIAL AID

Open house for high school students in February, 1962, was attended by 110 students from 15 high schools. At other times during the year several high schools requested tours of the hospital and school for their students. One thousand fifty-two catalogs were mailed in answer to inquiries.

Three hundred forty applications were processed. One hundred fifty-one students were admitted and 99 rejected. Of the 151 students admitted, 73 were from Louisiana.

The hospital granted loans of \$110.00 to six students and of \$75.00 to two students. Scholarships sponsored by various organizations were granted to nine students amounting to \$3,690.00; six students received support from the Veterans Administration. Loans ranging from \$10.00 to \$150.00 and totaling \$3,399.00 were made from the Kellogg Loan Fund.

Students worked for hospital on a pay basis during their free time working a total of 1,229 days (7-1-61 thru 6-30-62).

RECOMMENDATIONS

1. Two additional Instructor positions.
2. Renovation of the bedrooms of students nurses' residence, including new flooring, painting, and new furnishing.
3. Air conditioning of the Education Building and the classroom in the student nurses' residence.
4. Replacement of screen doors with more suitable ones for the entrance to lobby.
5. Placement of the personnel in Student Nurses Living Quarters that are now on a 44-hour week on a 40-hour week. Two additional positions are needed to do this.

ACKNOWLEDGEMENTS

We thank the Board of Administrators and the Hospital Administration for their interest and courtesy in our behalf.

Respectfully submitted,

/s/ SISTER PAULINE, R.N.

ELECTROCARDIOGRAPH DEPARTMENT

The accompanying report shows the work performed in the Heart Station from July 1, 1961 through June 30, 1962. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardigrams, and cardiac fluoroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown for months is not available although the data were placed in the patient's records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There was also a pediatric clinic which is conducted every Friday.

I. Electrocardiograms

TOTAL EEG RECORDINGS1,178

TOTAL FETAL RECORDINGS 38

There were 13 holidays and 5 days lost due to air-conditioning shutdown. For 3 weeks in August, one EEG was out of operation due to leakage from Heart Station. 178 EEGs went unperformed for reasons as follows: 56 appointment cancellations too late to substitute, 15 patients (mostly psychotic) refused test on arrival at laboratory, 57 patients failed ever to appear, 22 requisition forms unsigned by referring doctor and/or otherwise incomplete, 28 patients for whom EEG appointments had been made were discharged from hospital without cancellation of appointments.

Respectfully submitted,

/s/ H. THARP POSEY, M. D.

Director,
Brain Wave Station.

HTP:ag.

DEPARTMENT OF ANESTHESIOLOGY

The following is a composite of the annual reports for the Departments of Anesthesia, Inhalation Therapy and Blood Bank during the fiscal year 1961-62. A total of 21,350 anesthetics were administered throughout the hospital. This includes all types—inhalation, regional, intravenous and local. Forty students were graduated from the School of Anesthesia for Nurses. Eight residents completed their training in the department. The residency was inspected by the Council on Medical Education of the American Medical Association and granted continued approval. On July 1st Dr. Jasse Mullen and Dr. Patricia Milazzo joined the staff as full time assistants. Dr. Carl Pope, who was my first assistant, resigned April to go into private practice at the Touro Infirmary in New Orleans. Miss Mary Koenig who has given 51 years of service to Charity Hospital retired as of June 31st and awarded a certificate by the Board of Administrators honoring her for her continued service at the hospital. Miss Juanita Childers took over Miss Koenig's duties on the Obstetrical Unit on the 10th floor. Mrs. Irene Adriani replaced Miss Aline Durnin, Educational Director of the School of Anesthesia for Nurses since Mrs. Durnin was appointed Director of the School to replace Miss Gebbs who retired July 1st because of disability. Two new anesthetic gas machines were purchased to replace two others which had become obsolete. A combination Corbin-Farnsworth cardiac Pacemaker and External Defibrillator together with an Electrocardiograph, Electroencephalograph and transducers for direct measurement of blood pressure was purchased and put into service in areas where portable equipment was required.

The Oxygen Therapy Department was expanded. New space was acquired on the 8th floor for storage of resuscitative and positive pressure equipment. Four new adult, two youth and two infant iron lungs, four Cofflators and two chest respirators were purchased for use in the Polio and Contagious Buildings. Two new oxygen tents were purchased for use in the Recovery Room.

The space on the first floor occupied by the library was taken over to expand the Donor Station. This division of the Blood Bank is undergoing alterations and will be ready for occupancy in August. New equipment including tiltable tables especially designed for blood banking were purchased. A team of a part of the staff of the Blood Donor Station made several trips to the penitentiary at Angola to obtain blood for the Hemophilic Association. Mrs. Maude Bowen was a recipient of the Dunbar award for distinguished service and was honored at a luncheon held April 12th at the Roosevelt Hotel. During the year 24,871 units of blood were collected and 18,517 were dispensed for transfusions.

Sincerely yours,

/s/ JOHN ADRIANI, M.D., DIRECTOR

Department of Anesthesia

JA:mg

LUNG STATION

During the fiscal year 1961-1962 there was little change in the type of services offered by the Lung Station. Some of our equipment was replaced by instruments with greater accuracy and sensitivity.

Routine ventilatory studies were carried out on 436 patients. 672 patients were more extensively studied for obstructive ventilatory diseases. Evaluation of the dynamics of breathing and the distribution of ventilatory function were carried out on an additional 139 patients.

Respiratory studies were performed on 103 patients of whom 73 had complete arterial gas tension studies before and after exercise.

Special diagnostic studies consisting of such procedures as drill biopsy, thorocentesis, arterial pH, and collection of bronchial exudate stimulated by the inhalation of a heated aerosol of hypertonic saline and propylene glycol were carried out on 610 patients. This category of service has been significantly expanded during the fiscal year 1961-62.

Although inhalational therapy is no longer a function of the Lung Station, provision for out patient service through the division of inhalational therapy has not been implemented as yet. We have tried to keep this service limited in the Lung Station to those who cannot remain ambulatory without it. With this restriction, inhalation therapy was necessary on only 273 occasions.

Respectfully submitted,

/s/ JOHN H. SEABURY, M.D.

Director, Lung Station

ALCOHOLIC REHABILITATION

The nine bed in-patient unit is still located in ward W1113. It has continued to function as a unit for the medical management of the acute withdrawal syndrome in alcoholics. During the year there have been 122 patients admitted to the service. This is the lowest number of admissions since the unit was established, and was due to the prolonged stay of patients on the ward, which in turn was secondary to the lethargic attitude of the resident staff towards treating these patients in a prompt and efficient manner. Recent changes in the administrative responsibility given the director should eliminate this problem; and it is hoped that the unit will operate more efficiently in fulfilling its service to the community by increasing patient turnover. This will be done by establishing a general policy that the average patient stay will be about two weeks, and certainly no longer than three weeks.

During the year we have continued to co-operate with the Alcoholism Education and Information Center at 408 Royal Street, both referring and accepting patients from them.

The Alcoholic out-patient clinic still meets in white Medicine Clinic 9:00 a.m. every Tuesday morning. This clinic is staffed by only one physician, the Director of the Unit. In recent years we have been seeing very few patients for out-patient treatment, preferring to send most of them to the Royal Street facility where here is a much larger staff comprising trained social workers, psychologists etc., for long term management of their problem.

Respectfully,

/s/ JOHN B. BOBEAR, M.D.

Alcoholic Rehabilitation Unit

TUMOR REGISTRY

At the close of this fiscal year, the first Director of the Registry (1947-1962) resigned and her replacement became Miss Brent S. Roberston. This report is therefore being submitted by the former Director of the Registry who is presently affiliated with the Registry in a consultant capacity.

BOARD OF DIRECTORS

The active administration of this program is delegated to the Director of the Tumor Registry through a governing Board of Directors. The Board consists of nine members representing six institutions, namely,

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

Dr. Leo J. Kerne
Dr. Manuel Garcia

LOUISIANA STATE UNIVERSITY SCHOOL OF MEDICINE

Dr. W. W. Frye
Dr. Ronald A. Welsh

TULANE UNIVERSITY SCHOOL OF MEDICINE

Dr. E. T. Kremenz
Dr. R. C. Smith

AMERICAN CANCER SOCIETY, LOUISIANA DIVISION, INC.

Dr. Charles C. Sprague

LOUISIANA STATE BOARD OF HEALTH

Dr. John M. Bruce

LOUISIANA STATE MEDICAL SOCIETY

Dr. Ambrose H. Storck

Dr. Edward T. Kremenz has served as Chairman of the Board since the fall of 1955. Dr. Kremenz is consulted frequently on administrative, financial and policy matters.

REGISTRY STAFF

The operation of the Registry is carried out by nine employees which includes the administrative director. There were four resignations during the fiscal year.

Dr. Robert F. Ryan continues to serve as Medical Consultant. In this capacity, Dr. Ryan gives medical lectures to the staff as well as decisions on problems which arise in medical case abstracting and coding.

Mr. William I. Lourie, Jr. and Mrs. Paula Baylis of the National Cancer Institute (C.C.N.S.C.) have lent assistance in coding, other related problems, and in the quality control sampling of records. Dr. Sidney J. Cutler is the chief of the End results Group, C.C.N.S.C.

Mr. Abraham Ringel and Mr. Herbert Seidman of the National office of the American Cancer Society, Inc. have served as consultants in their respective fields, Hospital Registry Consultant, and Chief of Statistical Analyses and Services.

FINANCIAL REPORT

Three of the six sponsoring agencies already named lend financial support, namely, Charity Hospital, the American Cancer Society, and the State Board of Health. In addition, certain monies are provided through a cost-reimbursement contract with the Cancer Chemotherapy National Service Center (C.C.N.S.C.) of the National Cancer Institute, Bethesda, Maryland. Thus support is derived from a total of four agencies.

STATUS OF REGISTRY RECORDS

22,590—Records on I.B.M. punch cards for a 13 year period, 1948-1960

1,737—Annual average number of cases for this period.

In addition, approximately thirteen hundred 1961 cases have been abstracted, coded and are presently being added to the punch card file bringing the new total to 23,997 cards. There are 69 "Lost" or untraced patients representing less than three tenths of one percent of the 23,997 total case load, which is indicative of a very fine record on patient follow-up.

INFORMATION PROVIDED BY THE REGISTRY

There has been a substantial increase in the number of requests from the medical staff of the hospital for information on selected subjects. This information is being and used for teaching, evaluation, preparation of papers and in some instances, published reports. The type of information provided by the Registry includes,

1. The listing of new and current cases of specific tumors for the physicians such as female pelvic, bladder, malignant neoplasms in children under 14 years of age and so on.
2. Follow-up information on individual patients to the physicians of this Hospital and also to other hospitals where the patient is known.
3. Information for the physicians obtained through electric machine processing and accounting such as,
 - A. Identity of patients records for specific tumors and other related data. Requests have included identity and other data of retinoblastomas, 1948-1960; thyroid, 1948-1959; carotid body tumors; carcinoid of the appendix and other sites; all brain tumors; mixed tumors of parotid, cystosarcoma phylloides, ameloblastomas and hemangiopericytomas; Ewins sarcoma and reticulum sarcoma of bone; pelvic tumors; breast; cystadenocarcinoma of the ovary; pituitary gland and so on.
 - B. Incidence and survival rates such as, number of cases by age for top ten anatomical sites; number of bladder cases by parish residence of patient; distribution by age by all anatomical sites; total head and neck cases by site for 12 year period versus total cases of all malignant neoplasms; seven statistical tables on multiple skin cancer and so on.
4. Information from the medical case abstracts, filed in anatomical site order by year of diagnosis, which contain more detailed information than the punch cards such as, surgical (biopsy) slide number on thyroid cases, Wilms tumors; surgical procedures on pancreas cases, breast cases; long term survival stomach cases by surgical procedure and so on.
5. Annual statistical reports to the medical staff of the hospital on the incidence and survival rate of patients with malignant neoplasms. This report was not submitted during this fiscal year, pending the receipt of an overall statistical analysis being prepared by Mr. Herbert Seidman at the National Office of the American Cancer Society, Inc. The latter will cover a 12 year period on incidence by race, sex, age, stage of disease, histological type of tumor, anatomical site, therapy, etc., and survival by this breakdown of incidence for each year of diagnosis of these cases. Such information will provide the medical staff of the hospital a year to year description of the cancer experience and an opportunity of evaluating areas of improvement and deficiencies.

Mr. Seidman, who is chief of Statistical Analyses and Services, Statistical Research Section, Medical Affairs Department of the American Cancer Society, Inc., New York City, has recently submitted copies of tables and graphs representing in part some of the data for his forthcoming report. These graphs are included. Those on survival and cure are not available at this time. When finalized, this analysis and report, representing an enormous amount of work, will be distributed to the medical staff of the hospital and the affiliated medical schools. Additional copies will be available in the Registry for other requests.

6. As per the contract with the End Results Group, C.C.N.S.C., of the National Cancer Institute, duplicate uniform punch cards were shipped at the close of the fiscal year for a segment of the cases including skin, melanoma, brain and nervous system, thyroid gland, other endocrine glands, bone, connective tissue, unknown and unspecified sites, and neoplasms of lymphatic and haematopoietic tissues; transmittal listings, tables, letters, and tables on patients follow-up.
7. Reports: Quarterly Progress Reports to C.C.N.S.C., National Cancer Institute; to the Tumor Registry Board of Directors; American College of Surgeons, Charity Hospital and other miscellaneous.
8. Information on the operational procedures and sample forms have been given to other hospitals interested in setting up registries of their own or reorganizing existing registries. Requests have come from the state, national and international level such as St. Patrick's Hospital, Lake Charles; Lahey Clinic, Boston, Methodist Hospital, Indianapolis, and Dr. Daniel Brachott, Ramat Gan, Israel.

A record of all requests for information is kept as well as copies of information released. All physicians are asked to fill in and sign a form for the request and release of information. This form not only outlines policy in releasing information, but serves also as a written statements on the desired information and for what use the information is intended.

ACTIVITIES AND ACCOMPLISHMENTS

SPECIAL STUDY ON CASES OF MULTIPLE SKIN CANCER

This was carried out in the summer of 1961 by the Registry staff. The doctors from the specialties interested in this subject were consulted in designing a special abstract form and code to provide the desired information, which was ultimately put on punch cards. A summary report with illustrative graphs was subsequently prepared and is available in the Registry.

PREPARATION OF HANDBOOKS OR MANUALS

Manuals have been prepared for each position and staff member in the Registry. The Manuals include position descriptions, outline of procedures, instructions in detail and work flow charts. The Manual for the Director of the Registry includes a history of the organization and development of the Registry, personnel, finances, inventory of equipment and supplies, procedures, sample forms, sample reports and so on. The Manuals currently in use are,

Manual for the Director of the Registry	1
Manual for the Analytic Assistant	1
Manual for the Follow-up Investigator	1
Manual for Abstracting and Coding	9
Manual for The Record Clerk	1

PURCHASE OF EQUIPMENT

Three secretary desks, two abstract case history letter size metal file cabinets and an IBM electric typewriter were purchased as authorized by the Tumor Registry Board of Directors.

WORKSHOP—CHICAGO, May 25-27, 1962

Sponsored by the End Results Group, Cancer Chemotherophy National Service Center (C.C.N.S.C.) of the National Cancer Institute, this three day meeting was attended by representatives from the participating registries in this national cooperative program and staff members of this agency. The representatives from this Registry were Dr. Robert F. Ryan, Mrs. Marion Wogan, Mrs. Marjorie Krennerich and Mrs. Marie Louise Nolan.

CANCER END RESULTS (C.C.N.S.C.—N.C.I.) Staging Classification of Cancer of the Larynx

Dr. Sidney J. Cutler, Executive Secretary of the End Results Group, extended an invitation to participate in this study. The American Joint Committee on Staging and End Results Reporting approved a proposed clinical (and final) staging classification for cancer of the larynx for testing, and requested that Dr. Cutler coordinate an extensive field trial. The protocol for the field trial was developed by an adhoc committee consisting of Dr. Robert R. Smith, Chief of Surgery, National Cancer Institute; Dr. Sidney J. Cutler and Mrs. Paula Baylis of the End Results Evaluation Section. A five-page form and a set of instructions and definitions to be applied to the abstracting of cases were submitted. The study was to be carried out by resident physicians and registry clerks with an independent review of the same series of hospital charts on a fee-for-service basis to each abstractor. Those who elected to participate in this study which was completed by the end of June of this year, were Dr. Charles E. Lavis; Dr. E. Weiffenbach, Charity Hospital physicians; and Mrs. Marjorie Krennerich from the Registry.

TUMOR REGISTRY BOARD OF DIRECTORS MEETING, May 22, 1962

This was a special called meeting to present to the Board notice of resignation from the Administrative Director of the Registry and a report on finances and personnel. The Director of the Registry had informed Dr. Krementz, Chairman of the Board, on October 16 of her intention to resign because of "increasing demands on my time by my family." Several meetings had been held with the Executive Committee of the Board to discuss desirable qualifications for the position and to recruit applicants, the result of which was presented at this meeting for further discussion and action. The final decision of the Board was to authorize Dr. Krementz, Chairman, to offer the position to Miss Brent S. Robertson and to retain the former Director as a technical consultant on a part time basis for an undetermined period at the discretion of the Board. Miss Robertson, with a wide experience in the medical field, officially assumed the position as Administrative Director of the Registry on June 18, 1962, just prior to the end of the fiscal year.

Expressions of appreciation for the interest and assistance given over the years were sent by the former Director to the members of the Board, consultants and others as well as recognition of the staff of the Registry for a job well done. A special vote of thanks was extended to Dr. Krementz who has served so ably and faithfully as Chairman of the Board of Directors; Dr. Ryan, Medical Consultant; Doctors Manuel Garcia and Ambrose Storck, who served on the Cancer Coordinating Committee and were, with other physicians, as well as Mr. John Lamassen of the State Board of Health and Mrs. Marian Simmons (retired) of the American Cancer Society, responsible for getting the Registry established in 1947.

CONCLUSION

Finally, I should like to acknowledge with much appreciation the splendid cooperation and assistance given by the Director of the Hospital, his Assistants, the Hospital Department Heads and employees.

Respectfully submitted,

/s/ MRS. MARION WOGAN, DIRECTOR

Tumor Registry, 1947—June 1962

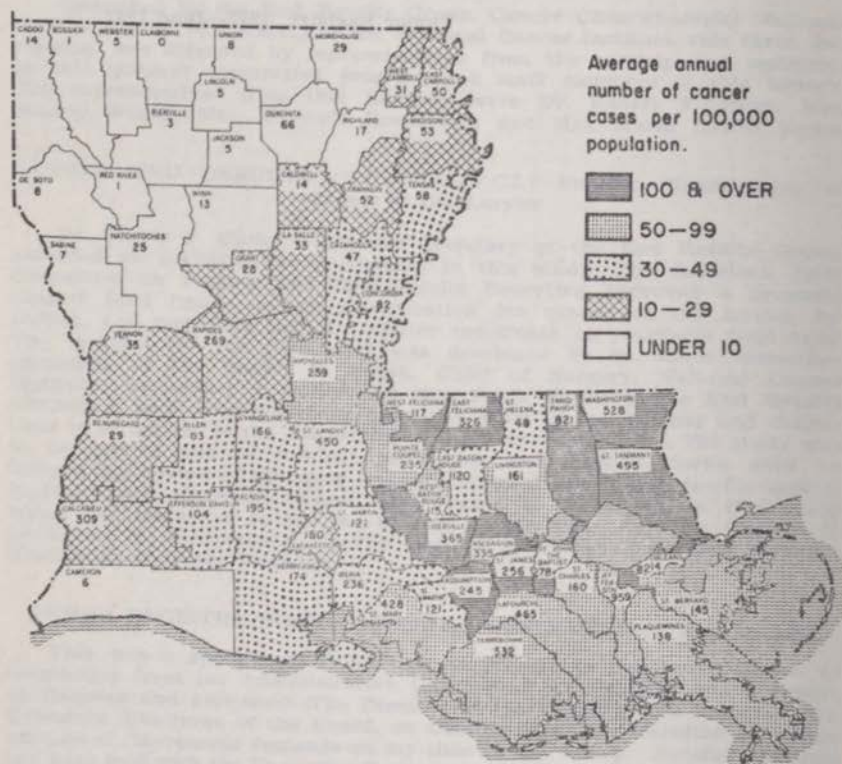

Figure 1. The number of cancer cases treated at Charity Hospital of Louisiana at New Orleans, 1948-1959, are shown for each parish of residence. The total was 19,812. The shading indicates the average annual number of cancer cases per 100,000 population treated at Charity Hospital at New Orleans, by parish of residence.

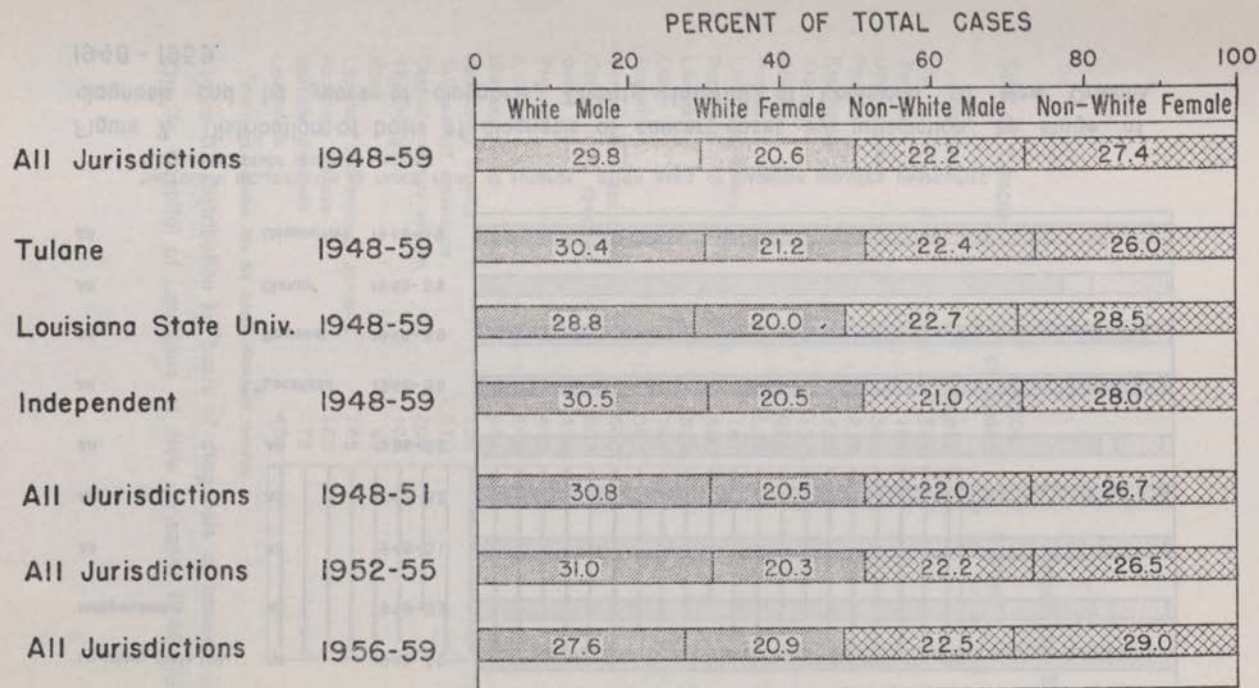

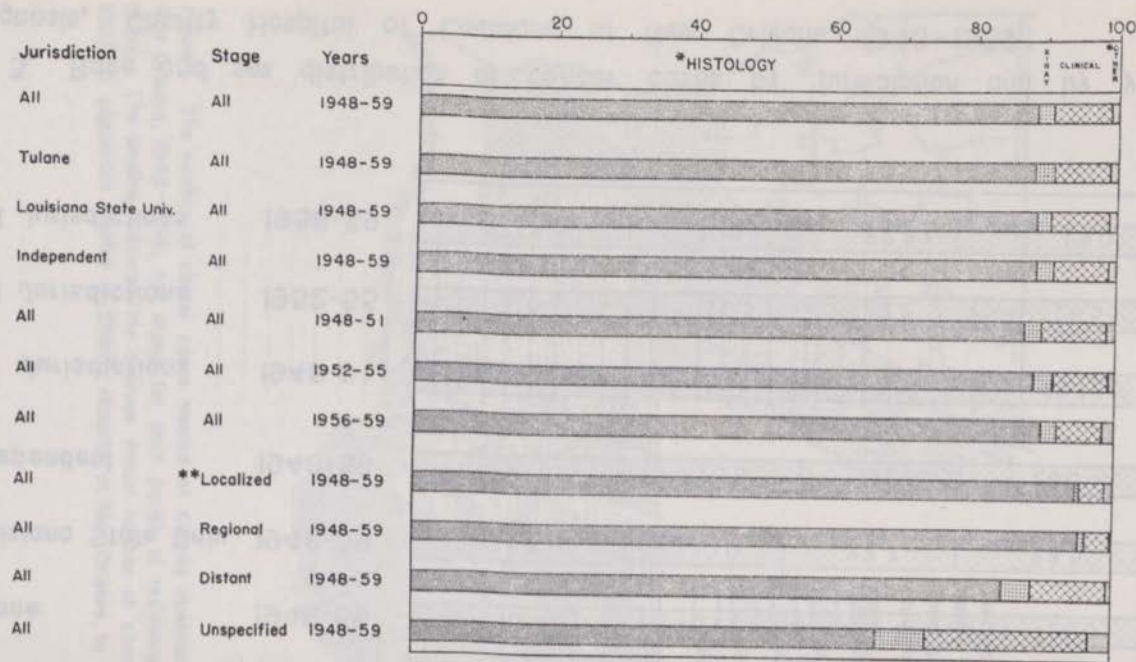

Figure 3. Race and sex distribution of cancer cases by jurisdiction and by years of diagnosis, Charity Hospital of Louisiana at New Orleans, 1948-1959.

*HISTOLOGY INCLUDES THE 82 CASES FOUND AT AUTOPSY. OTHER BASIS OF DIAGNOSIS INCLUDES UNSPECIFIED.

**LOCALIZED STAGE INCLUDES IN-SITU.

Figure 7. Distribution of basis of diagnosis of cancer cases by jurisdiction, by stage at diagnosis and by years of diagnosis, Charity Hospital of Louisiana at New Orleans, 1948-1959.

*Histology includes the 82 cases found at autopsy.

Figure 8. Distribution by basis of diagnosis of cancer cases by site, Charity Hospital of Louisiana at New Orleans, 1948-1959.

*Localized includes in-situ

Figure 9. Distribution by stage at diagnosis of cases with stage specified of cancer except for leukemias and lymphomas, by jurisdiction and by years of diagnosis, Charity Hospital of Louisiana at New Orleans, 1948-1959.

INTAKE DEPARTMENT

Total Intake traffic volume for the year in the Colored Section was:
57,204 Interviews processed.

In the White Section:
23,870 Interviews were processed.

In the Colored Section:
23,334 applicants were made Eligible.
9,601 applicants were made Ineligible.
8,776 applicants were given Temporary Eligibility.
1,368 applicants were given Temporary Eligibility.
5,972 applicants were DPW cases, and
8,153 applicants are still being investigated.

In the White Section:
7,502 applicants were made Eligible.
5,588 applicants were made Ineligible.
4,106 applicants were given Temporary Eligibility.
2,239 applicants were given limited Eligibility.
2,438 applicants were DPW cases, and
1,997 applicants are still being investigated.

Both Sections registered declines compared with volume last year:

1,132 fewer Interviews were processed in the Colored Section
(down 1.94%), and
1,126 fewer Interviews were processed in the White Section
(down 4.51%).

Average number of Interviews processed in the Colored Section was:

Daily	Weekly	Monthly
156.72	1,097.04	4,767.00

Average White Interviews processed were:

Daily	Weekly	Monthly
65.40	457.80	1,989.17

The highest monthly volume registered in the Colored Section was:
5,460 Interviews processed (May, 1962).

The lowest monthly volume registered in the Colored Section was:
3,519 Interviews processed (December, 1961).

In the White Section the highest monthly volume registered was:
2,237 Interviews processed (June, 1962).

And the lowest monthly volume registered in the White Section was:
1,546 Interviews processed (December, 1961).

Ratio of Ineligible decisions to each 100 completed Interviews in the Colored Section was:

19.57

Ratio of ineligible decisions to each 100 completed Interviews in the White Section was:

25.55

SOCIAL SERVICE DEPARTMENT

The central function of this department is to give casework services to the patients of Charity Hospital wards, clinics, and accident and admitting rooms. This means providing professional assistance for those of our patients who cannot, without this help, cope with the social disorganization which so frequently accompanies serious illness. Such difficulties may cause severe hardship for the patient and his family in terms of financial distress and emotional strain; in terms of hospital administration, these difficulties may create obstacles to planning and treatment which nullify the benefits of hospitalization, or slow the progress of diagnosis, treatment, and discharge, at the cost of smooth and efficient management of patient care.

SERVICES TO PATIENTS

Work may be directly with the patient, his relatives, or other interested persons, or it may be through other social agencies in the community. In the latter instances, the social worker refers the patients to the appropriate agency, serving as liaison for the exchange of information, and participating in joint planning. Within the hospital, close collaboration with the medical and nursing staff is necessary in order that the worker may understand the patient's problem is attained. Some examples of the types of help made available are:

Rehabilitation services for the partially or temporarily handicapped patient.

Discharge planning for the chronically ill patient who will continue to need nursing care when it is time for him to leave the hospital.

Helping the patient and his family to make necessary adjustments, physically and emotionally, to conditions which are painful, disfiguring, or otherwise disabling, thus enabling them to make the best possible use of their remaining assets.

Financial assistance for families whose breadwinner is incapacitated.

Admission studies and social histories to assist in diagnostic studies and planning.

Investigation to determine the suitability of homes of children where there is question of neglect, abuse, or inability of the parents to provide proper care. When the home is found to be inadequate, plans for improvement may be worked out, or substitute homes sought.

Although 43,462 patients were seen by the social workers during the past year. This represents an increase of 2,601 over the preceding year, which may be accounted for by the fact that there was slightly more stability of staff than there has been for the past few years. Permanent records were kept in 13,869 cases. These were the instances in which a record was required as a part of the casework process, to facilitate supervision, or was considered valuable for future use. Services to patients vary widely, from very simple direct ones requiring one or two contacts only, to the more complicated kinds of situations in which more prolonged, intensive contacts are needed.

Not every patient who comes to the hospital needs the help of a social worker. For this reason, as well as because of staff limitations, only selected patients are seen by the social workers. Referrals from any source are accepted, and hospital staff, particularly, are encouraged to bring to the attention of the social workers any patients who seem to be in need of their services. Sources of referral for the year were as follows:

Hospital Personnel	14,806
Department of Public Welfare	3,507
Other Agencies	1,986
Patient or Patient Group	23,163
Total	43,462

As in previous years, the place of residence of patients known to Social Service follows rather closely the pattern for the hospital as a whole. The majority are residents of Orleans Parish, although there is an appreciable number from other parishes in the State. A few non-residents are accounted for by the fact that some non-resident patients are given emergency treatment in the hospital, and may need additional help in planning after such treatment is completed. The breakdown as to residence is as follows:

Orleans Parish	28,478
Other Parishes	14,720
Other States	264
Total	43,462

For several years past it has been necessary to curtail services in certain sections of the hospital, because of acute shortages of staff. Because there were not enough workers to give adequate coverage throughout the hospital, it was necessary to withdraw workers from most of the clinics. This was most unfortunate since it deprived the patients of assistance that they needed, and it also inconvenienced medical personnel who rely upon the social workers to help with following through on plans for patients. Additionally, it has created a tremendous strain on the supervisory staff of the department who were required to give emergency service in the clinics which were not covered. With the coming year, however, the prospect for better staff coverage is good, and it is anticipated that workers will be available for each clinic, as well as for the admitting rooms, accident rooms, and all wards.

USE OF FUNDS

Charity Hospital patients are of the borderline or submarginal income group. For this reason the cost of medical care is beyond their means. All medical needs are met by the hospital while the patient is on the ward; but clinic, accident and admitting room patients must provide for themselves, medications, appliances (braces, crutches, glasses, prostheses), transportation, and shelter (for out of town clinic patients). In instances in which the family is barely able to manage the bare necessities of life, money to cover these medical needs is simply not available. Most commonly, in these cases, the help of other social agencies in the community is enlisted, but this is not always possible.

The Social Service Department has at its disposal certain limited funds which may be used when absolutely no other resources exists. These funds derive from hospital appropriation, bequests, and special donations. They are listed below:

Fund	Amount Available
Stauffer-Eastwick	\$ 4,800.00
Patients Welfare	1,200.00
Weil Convalescent	360.00
Insulin Fund	6,000.00
American Cancer Society	1,276.30
Special Donations	842.65
TOTAL	\$14,478.95

Funds were expended as follows:

Reason for using funds	No. of patients	Amount Expended
Medication	13,302	\$11,234.59
Transportation	372	607.00
Maintenance	26	148.00
Appliances	666	1,841.00
TOTAL	14,366	\$13,830.50

Slightly less money was spent than was available. This should not be interpreted to mean that there was more money than was needed. On the contrary, there are large areas of unmet needs, particularly in regard to medications for clinic patients. This problem becomes more serious each year, with more patients being treated on an out-patient basis, and with the cost of so many drugs being so high. During the past year the department was able to help only 13,302 of the 24,600 patients who were referred to us because they could not buy medication prescribed by the doctors in the clinics.

STAFF

The problem of recruiting and maintaining professional staff remains, but there have been positive developments which offer some encouragement. The rate of turnover for the past year was less than for the year preceding (an average of seven vacancies out of 31 allocated positions, as compared with 14 the previous year). Twelve full time and two part workers resigned, and one full time worker retired. There were replacement of eleven full time and two part time workers.

Part of the difficulty in this area is that there is an acute shortage of trained social workers throughout the country. This means that qualified workers are much in demand, and that salaries are highly competitive. Recruitment of such personnel in this department has been implemented by participation in the Mental Health Program of the State Department of Hospitals. Under this program, students are given stipends to enable them to complete their professional training in social work, with a commitment to work for the designated State agency upon graduation. This department has been granted two such stipends.

Although the number of vacancies continues to be alarmingly high, the situation is more favorable at this time than it has been for several years. With the addition of five recent graduates, as of the beginning of the new fiscal year, the status of the staff is as follows:

Classification	Positions Allocated	Vacancies
Typist-Clerk I	4	1
Typist-Clerk II	3	0
Dictaphone Operator I	1	1
Dictaphone Operator II	1	0
Clerk II	1	0
Account-Clerk I	1	0
Receptionist	1	0
Clerk IV	1	0
Institution Counselor (Case Aide)		
(College Graduate)	3	1
Social Casework Assistant		(4 part time)
(one year of graduate training)	10	2
Clinical Social Workers		
(Master's Degree in Social Work)	18*	3
Supervisors (Master's Degree in Social Work		
plus clinical experience)	6	2
Director (Master's Degree in Social Work		
plus clinical experience)	1	0

*The salary of one of these positions is paid by the American Cancer Society.

Efficiency of operation has been greatly increased by the development of case aide positions. These were converted from a number of casework assistant positions which had been vacant for many years, and for which qualified personnel could not be found. Aides are assigned to specific services, where they have proved most effective in handling the less complicated types of problems, thus freeing the caseworker to devote more time and attention to the particular kind of service for which his training and experience equip him.

Twelve social work students were placed in the department for their field work training. Under close faculty supervision, from both the Tulane and LSU Schools of Social Work, these students gain practical experience here in their chosen field. They are assigned selected patients from the caseloads of the regular workers, usually about 15 cases each. Five of the Tulane students were assigned to a special project, whose objective was to demonstrate the practicability of combining the traditional "Psychiatric" and "Medical" social work training into a more comprehensive clinical base. These students' cases were selected from services throughout the hospital, with a wide variety of diagnoses, and emphasis in teaching on the inter-relationships between the various specialties. The consensus was that this demonstration was highly successful, and the project will be continued during the coming academic year.

It was necessary that some of the space assigned to the student unit be relinquished in order that a special dental clinic might be accommodated. This was accomplished without seriously handicapping the student unit because it was possible to plan for more efficient use of the remaining space by relocating partitions, and by removing certain fixtures which were not used, but which occupied space that could be used to better advantage.

Volunteer workers have been most helpful as case aides, clerical assistants, and receptionists. Two, in particular, have stood out as capable, responsible workers.

Respectfully submitted,

MHH:AM

MEDICAL AND PATIENTS' LIBRARY

The library staff remained the same during the past year. It consists of the librarian, librarian's assistant and four medical students who work at night and during the week-ends. Volunteers help with the book truck on the ward rounds. Everyone cooperated and faithfully worked during the big task of moving the library.

READING ROOM ACTIVITIES

A great change was made in October 1961. The library was moved from the first floor to the sixth floor. It was a necessary move so the blood bank could be enlarged. We moved into the quarters of the former classroom for nurses. It was actually only about three weeks the maintenance department took to convert the place into the library. They remodeled the original wood work from the first floor to fit into the space on the sixth floor. Everyone worked hard. It wasn't long before the library was organized again. The medical and professional staff was very patient during the process of moving. The Board of Charity Hospital helped in every way. A new floor covering was put down. A motion for air-condition was passed by the Board members. The work has been completed. Everyone appreciates the Board thinking of the doctors' comfort. The library looks almost like it did when it was on the first floor.

The library has the basic texts of medicine and journals for the staff. There are many magazines and books for their recreational reading. Books are brought through the Henderson Fund and the others are gifts from various sources.

WARD ROUND

The wards rounds were made daily by the regular staff and by volunteers who are trained for the work. Only magazines are sent to the tenth floor because the patients are here for such a short time. The third floor is supplied with magazines and books. The books which are sent to the third floor are good duplicates but are not catalogued. Gift books are shared with Dibert.

Our source of supply comes from the generosity of the personnel of Charity Hospital, clubs, business houses, churches, unclaimed mail from a branch post office, staff of Tulane and L.S.U. and volunteers. We receive magazines from outside the parish of Orleans as well as from the Gulf Coast. All our paper-back books are gifts. We do not catalogue them. Every thing we receive is appreciated by everyone.

The following are some of the activities of the members of the Charity Hospital Guild for the Hospital and the patients.

In addition to making and wrapping surgical dressings, sixth-two (62) baby layettes were made and given as needed. A large amount of new and used clothing, shoes, books, magazines, scrap-books, picture puzzles games and toys were distributed.

At Christmas several hundred dolls and toys were given to the children on the Ninth Floor, and to the children in the contagious, polio, and tubercular wards, by Mrs. Walter Grunning, Chairman of the Doll and Toy Committee. Ice cream, cakes and candy were also given to the children of the contagious, polio and tubercular wards.

At Christmas and Easter, a party was given to the children of the tubercular ward by the colored Willing Workers of the Guild.

Special attention is given to the John Dibert male patients by the Magnolia Branch of the Louisiana Sunshine Society, Mrs. B. H. Gilden President. This Society gave five parties during the year for the patients Fathers Day Party, Bingo Party, Halloween Party, Easter Party and Christmas Party.

At the Christmas Party two 23IN. television sets were presented, and each patient received a package of charm candies with a dollar bill attached. At the Easter Party each patient received an Easter Rabbit filled with chocolate eggs, cigarettes and matches. One dozen decks of playing cards and one large domino game was also given. At all five parties entertainment was furnished, refreshments served, and Bingo was played for prizes. The Diebert patients also receive four pounds of coffee and magazines weekly from these ladies.

The Magnolia Sunshine Ladies also contribute their time to the Guild room each week to help wrap surgical dressings. They make baby garments at home, to be added to the layettes.

Four parties were given by the Guild members to honor the ladies of The Golden Age Club, who come to the Guild Room weekly to help make wrap surgical dressings.

ENGINEERING DEPARTMENT

BOILERS

The six boilers in the Power House with a capacity of 2,850 Horse Power are chemically treated and operated on monthly intervals, and inspected yearly externally and internally by the Travelers Insurance Company's Inspectors; cleaning of the boilers are made immediately after taking out of service. If repairs are needed between yearly inspections, the Inspectors are called and recommendations are completed. Painted Main Gas Line for boilers in basement of Power House which is done yearly to prevent deterioration because of heat and condensate moisture.

HEATERS ON MEZZANINE FLOOR IN POWER HOUSE

Removed old deteriorated Boiler Feed Water Heater, replaced with a New Cochran Deaerating Heater, installation was installed by Mechanical Engineers and Company, since completion of installation, heaters are operated on semi-monthly intervals. James F. O'Neil and Company installed 100 feet of 8 inch Byers Wrought Iron Pipe from condensate return tank on roof of Power to boiler Feed Water Heaters on Mezzanine Floor in Power House, replacing old standard deteriorated pipe. Repaired Golden Anderson Valve that controls make-up water to the boiler Feed water Heaters.

HOT WATER PUMPS

Removed two deteriorated Hot Water Pumps which capacity was not large enough to take care of additional capacities that has been recently added in the Hospital, with two Coppus Turbine Driven Peerless Centrifugal two-stage pumps in the Power House that delivers hot softening water throughout the Hospital Buildings, installation was successful.

ICE PLANT

Routine minor repairs on bearings, valves and painting equipment to prevent deterioration.

WATER SOFTENERS

Cleaned stone bed thoroughly in each Brine Tank, scaled and painted exterior of the four Water Softeners, routine on units.

ICE WATER SYSTEM

Repairs were made on the Ayers Cooling Tower controlling water conditions for the Ice Water and Ice Plant. Repairs consisted of replacing old with New Gear Box on large fan; repaired condensor pump, metalized shaft, trued same, replaced old with New Bearings.

WORTHINGTON AIR CONDITION COMPRESSORS (1000 Tons to Main Building)

Made yearly inspection on both No. 1 and No. 2 compressors, checked alignment, installed New Thrust Bearing, repaired purge unit, put 200 lbs. of Freon 11 in Evaporator in No. 2 Compressor, cleaned condensers, painted interior and heads of both units; Atlas Electric Company insulated Collector Rings, faced Commutator on No. 2—500 H.P. Synchronous Motor. At present the Ross Corporation Construction Company are installing Two 350 Ton Trane Air Condition Units on the Mezzanine Floor in Power House to refrigerate and deliver chill water to certain sections of the Main Building for Air Condition.

MURRAY TURBO EMERGENCY GENERATOR—(1000 K. W.)

Run this Generator semi-monthly with load of 400 to 500 K. W. throughout the year, during the month of May repairs were made in the Main Transformer Vault, city electrical power was cut off, the Emergency Generator carried the load required. At present a General Motor Diesel 1200 K. W. Emergency Generator has been installed, but not accepted, this Generator will control certain important sections of the Main Building. During the year oil has been changed in all Transformer Vaults in the Hospital.

Hospital Employees take care of all Maintenance, Operation of Equipment in the Engineering Department.

Hoping that this report meets with your approval, I remain,

Yours truly,

/s/ WILLIAM H. SUTHERLAND

Plant Engineer
Charity Hospital of La.

CJA/gd

TULANE METABOLIC UNIT

This was the sixteenth year of operation of the Tulane Metabolic Unit at Charity Hospital which is located on the sixth floor of the Lapeyre-Miltenberger Building. The Unit consist of a ward subdivided into three rooms containing a total of eleven beds, a treatment room, a kitchen for the preparation of special diets and two sitting rooms which are shared with the Arthritis Unit.

The medical staff includes Dr. Grace A. Goldsmith, Professor of Medicine and Chief of the Nutrition-Metabolic Unit of the Department of Medicine at Tulane University, Dr. Brian McCracken, Associate Professor of Medicine, Dr. Carlos Lamar, Instructor in Medicine and Dr. Karoly Pinter, Instructor in Medicine. Dr. McCracken and Dr. Lamar give daily supervision to the unit and are assisted by one of the fellows of the Nutrition-Metabolism group at Tulane. The fellows are rotated through the unit every three months. A Charity Hospital resident is assigned to nutrition ward rounds and gives assistance to the unit. The staff also includes a dietitian who is a member of the Tulane Nutrition-Metabolism group and nursing personnel, namely, two registered nurses, two white practical nurses and three colored practical nurse. The salaries of the dietitian and nursing staff are paid from research funds given to the Nutrition-Metabolism Unit of the Department of Medicine at Tulane by the U. S. Public Health Service and the Nutrition Foundation. Provision of physical facilities and numerous other services by Charity Hospital have made this unit possible and contributed significantly to its success.

The aims of the unit are 1) to provide special diagnostic and therapeutic services to patients with disease of nutrition and metabolism, which services would be impossible without a special facility. 2) To conduct clinical investigation of disease of nutrition and metabolism. 3) To provide training for medical students, residents of Charity Hospital and postgraduate physicians who are fellows in the Department of Medicine at Tulane and 4) to provide consultation services to other units of Charity Hospital.

During the past year, eight physicians who were receiving postgraduate training in nutrition and metabolism at Tulane University received intensive training in this unit. In addition, residents of Charity Hospital who were assigned to nutrition rounds participated in this training. The unit is used also in the training of dietitians at Charity Hospital. Each dietetic intern spends ten days to two weeks on the ward learning the special techniques which are used in metabolic studies.

During the past year, ninety patients have been studied on the Metabolic Unit. The average daily census on the ward was approximately eight patients. The patients who were studied on the unit had a wide variety of metabolic, nutritional and endocrine diseases included macrocytic anemias, malabsorption syndromes, cirrhosis of the liver and other types of diseases affecting this organ, hypercholesterolemia and atherosclerosis, nutritional polyneuritis, obesity, and vitamin and protein deficiency states. Many of the diagnostic studies conducted on the unit are possible only because of this facility since accurate standardized diets are required as are complete collections of feces and urine. Tests which are being used include estimation of blood levels of lipids and hormones, determination of excretion of lipids, bile acids and sterols, estimation of vitamin levels in serum and urine, measurements of absorption of nutrients from the gastrointestinal tract and certain enzyme determinations. Research is being conducted on a number of problems. The cause, diagnosis and treatment of macrocytic anemias is being investigated, particularly anemias associated with malabsorption syndromes. The role of folic acid and vitamin B₁₂ in these conditions is being determined. A study which has received particular attention has dealt with mechanisms by which dietary fat, protein and carbohydrate and certain pharmacologic agents influence serum lipid levels in patients with

hypercholesterolemia and atherosclerosis. Another investigation deals with studies of the metabolism of obese subjects. These studies have resulted in presentation of a number of papers at national meetings and results have been published in medical and other scientific journals. The splendid contribution made by Charity Hospital through provision of this facility is greatly appreciated. The training and research carried on in this unit has gained wide recognition and has given well deserved credit to the hospital.

ARTHRITIS UNIT

This report of the activities of the arthritis unit covers the period July 1, 1961 through June 30, 1962. This Unit, in the Lapeyre-Miltner Building, consists of a ward on the sixth floor which is subdivided into four small rooms, thus allowing for the separation of races and sexes. A treatment room, toilet facilities and two sitting rooms are provided on this floor and are shared with the Nutrition and Metabolism Unit. The Unit has eleven beds, which is the maximum number the space will allow, and these are virtually always filled. On the fifth floor, the Unit has been allocated a large physiotherapy room which has been equipped with a Hubbard Tank and other appropriate equipment by the Arthritis and Rheumatism Foundation. This space is used both for the intensive treatment of the in-patients and also for some Charity Hospital out-patients who are attending the Arthritis Clinic.

I. The Staff

The medical staff has undergone some changes during this third year of operation. Dr. Maurice R. Jeffrey, who contributed significantly in the development of the Unit, resigned in July, 1961 to return to his native England. Dr. C. E. Herr, Training Fellow in Arthritis, sponsored by the National Institute of Arthritis and Metabolic Diseases was recalled to active duty with the Army in October, 1961. Dr. Joan M. Bremner was Visiting Associate Professor of Medicine from July, 1961 through June, 1962. The present staff consists of Dr. Oren B. Gum, Associate Professor of Medicine, Tulane University School of Medicine, and Medical Director of the Louisiana Chapter of the Arthritis and Rheumatism Foundation, Dr. Roshen Irani who was appointed a Training Fellow in Arthritis in March, 1962 and one or two Medical Residents from the Tulane Service. These Residents are responsible for the day to day care of the patients and for their records.

The nursing staff consists of one registered nurse and five practical nurses, which is the minimum number to ensure that a nurse is always on duty in the ward. Three nurses' aides are also employed to assist in the running of the ward, to transport patients to physiotherapy, or elsewhere, to prepare patients for therapy and assist in its administration.

Physiotherapy is given by one therapist to both in-patients and out-patients. After leaving the hospital, severely disabled patients in the New Orleans area may be given physiotherapy at home by the Home Care Therapist of the Arthritis and Rheumatism Foundation. This therapist conducts weekly a most successful class in hand therapy, for in-patients and out-patients.

The salaries of all nursing and physiotherapy staff are provided by the Louisiana Chapter of the Arthritis and Rheumatism Foundation. The ability of the Arthritis and Rheumatism Foundation to support the Unit is due entirely to the generous allocation by the United Fund for the Greater New Orleans Area. This contribution of money is approximately equaled in financial value by the provision of space, physical facilities, meals and many other services by Charity Hospital, without whose participation the Unit could not exist.

II. Aims of the Unit

The prime and immediate aim in the Unit is to provide facilities for the long term treatment and rehabilitation of suffers from chronic arthritis. The general wards of Charity Hospital are continuously busy, and many patients are severely and acutely ill. It is thus very difficult for patients with chronic arthritis to be retained in these wards for prolonged periods. The provisions of the Arthritis Ward, to which selected cases who appear to offer good prospects for rehabilitation may be admitted for as long as necessary and in which they may have treatment as frequently as necessary, represents a major improvement in the services available to arthritis

sufferers in this community. The Unit offers facilities for prolonged rest and, also, for intensive physiotherapy in the more active stages of rehabilitation.

The Unit fulfills a considerable teaching role. The Training Fellow and Medicine Residents receive first experience in the management of all phases of chronic arthritis; this experience includes the medical care, fundamentals of physiotherapy and rehabilitation, and the place of orthopedic surgery in the management of rheumatic diseases. Other Residents and interns are encouraged to visit the Unit, and informal demonstrations for students and student nurses are arranged throughout the year. Frequent conferences with Medical Social Workers emphasize their important function in mobilizing available social resources to adapt the patient's environment to his disability. It is hoped that by showing what can be done in suitable cases, the Unit will help to raise the general standard of care of the arthritic patient, and will encourage and facilitate the development of research projects into problems of causation and treatment.

Intensive and prolonged treatment is essential for the adequate rehabilitation of the arthritic patient. Though initially expensive in time and manpower, this treatment does, in fact, represent a saving to the community, as well as greatly reducing human suffering. The National Health Education Committee, Inc. in a recent report states: "Less than 1,000 hospital beds in the country are available for the study of the rheumatic diseases. Of these only about 150 are free beds specifically endowed for the use of the thousands upon thousands of indigent arthritics. Another 25 free beds for the study of selected arthritis patients are available at the National Institutes of Health, U.S. Public Health Service, Bethesda, Maryland. Of the 1% of rheumatic patients who do get hospital care, whether in free beds or otherwise, very few are able to remain long enough to receive much benefits from their hospitalization."¹ The care of the chronic arthritic patient over a period of years represents a very sizable amount of money and even families in better than moderate circumstances find their savings vitiated by the tremendous expense incurred. Patients who have been able to afford private medical care over a period of time find their resources are inadequate to cope with the financial demand of such a disease and seek indigent care. In the three years the Arthritis Unit has been in operation, many arthritics have made significant progress toward rehabilitation. It is being shown in other center that many arthritis sufferers can return to productive work and remain in employment, if their disease is treated carefully for a prolonged period and their way of life is properly ordered from the early stages. "In spite of the vast amount of crippling and deformity to which rheumatoid arthritis leads, the prognosis is by no means as unfavorable as is generally supposed and with early and proper treatment, crippling can be prevented in 70% of the cases."²

III. Patients Treated

Patients must, of course, be screened by the In-Take Department of Charity Hospital. In order to utilize the facilities to best advantage, the Medical Director has the responsibility of deciding which patients from the many applicants shall be admitted.

In the third year of operation 73 patients were admitted to the Arthritis Ward. The total number of patient-days was 3,477 indicating that the beds were occupied virtually at all times. The average length of stay was 47.6 days with a range of seven to 177 days. The admission were approximately equally divided between the races with 35 Caucasian and 38 Negro patients. Approximately twice as many females were admitted com-

¹What is the Prevalence and Cost of Arthritis and Rheumatism? What is Being Done for People With These Diseases?, National Health Education Committee, Inc., 135 East 42nd Street, New York 17, N.Y. p. 13

²Ibid., p.3

pared to males (48:25) which probably reflects the greater incidence of rheumatoid arthritis in the female. Most epidemiological studies have shown that rheumatoid arthritis attacks the female twice as often as the male.

IV. Diseases Treated

The majority of the patients, 66 of the 73 admitted, had rheumatoid arthritis. This disease although not necessarily crippling if intensive treatment is instituted sufficiently early, is the number one crippler of the arthritic diseases due to its frequency and chronicity. Since it frequently attacks women in their thirties and forties, it often has a tremendous impact on families with small children. Frequently the affected mother cannot carry out her household duties resulting in economic and emotional stresses in the family. Three additional patients had rheumatoid arthritis with a dissemination of their disease to stimulate the clinical characteristics of lupus erythematosus. Two patients had osteoarthritis, one hemophilic arthritis, and one had ankylosing spondylitis.

V. Aims and Nature of Treatment

Treatment is designed to provide prolonged and adequate rest in the acute stages of joint involvement, along with very gentle physiotherapy to retain range of motion in affected joints and to strengthen weak muscles. After the subsidence of acute episodes and in patients with initially relatively inactive disease, a program of graduated physiotherapy is instituted, aimed at the re-establishment of useful joint function by increasing the range of motion, strengthening muscles and improving coordination. Apart from gaps caused by intercurrent illness, patients attended the physiotherapy department daily, and in addition, receive a considerable amount of the simpler forms of treatment on the ward in the evenings and on weekends. Treatment such as radiant heat and application of hot packs, prone lying and simple exercises, in which the patient has received instruction, are readily performed on the ward under the supervision of the nurse in charge. Orthopedic consultation is available from the Tulane Orthopedic Division and has frequently been requested.

Medical Social Worker saw many of the patients and helped them and their families in facing the problems of chronic disease. Occupational therapists have given great help in coordinating hand functions with creative or recreational therapy.

VI. Results

Assessment of the results of treating chronic disabling disease is extremely difficult because of the impact of so many factors, other than the patient's disease, on his ability to perform various functions. A patient may be quite fit for a certain light job, if he owns an automobile; this same patient may be totally unable to work if he has to walk five blocks from his home and then use public transportation. The grading of housewives is extremely difficult, for their work involves many tasks which can be done in their own time, and the end results are difficult to assess objectively. Improvement shows itself in increased speed and accuracy and lessened discomfort in the performance of many everyday tasks, but extension of activities depends on many factors such as the arrangement of the house, ages of the children, husband's working hours and the number of helpers available.

It is difficult to evaluate quantitatively the results obtained in the rehabilitation of these patients. Qualitatively there is little difficulty, however, in observing the improvement both physically and mentally that these patients show. Several who have been unable to walk have been sufficiently helped so that they are able to move about to some degree. Others through improvement of function of their hands and arms have regained the ability to perform duties which permits them to be less dependent on others. Sincere expressions of gratitude have come from housewives and their husbands after

restoration to the point where they could manage their families and households. Rehabilitation of men is more difficult. Many of our patients have been accustomed to earning their livings by brawn; with limited education it is difficult to fit the patient to a more sedentary job, even though improved physical status would enable him to hold such a job. However, these men are more capable of taking care of their daily needs and consequently are less dependent on other members of their families and society.

In addition to the benefits derived from improvement in physical capabilities, these patients have shown marked improvement in their mental outlook. The time spent in the Unit allows the patient to learn more about his disease and acquaints him with a rehabilitation program tailored to his particular case. As a result, the patient is stimulated to continue working at home with a positive program toward regaining lost function. Without such a program of guidance, the patient often loses interest in rehabilitative measures and develops an apathy toward his disease and life in general.

VII. Conclusions

Through the excellent cooperation of Charity Hospital and Tulane University Medical School and through the generosity of the United Fund for the Greater New Orleans Area to the Louisiana Chapter of the Arthritis and Rheumatism Foundation, the Arthritis Unit has been enabled to complete a third year of successful operation. The Unit has demonstrated its usefulness in the treatment and early phases of rehabilitation of patients with chronic rheumatic disease. The favorable results of treatment obtained during the first two years of operation have been carried over, as evidenced by the continued improvement of most patients.

PEDIATRIC RECREATIONAL PROGRAM

SPONSORED BY THE COUNCIL OF JEWISH WOMEN, GREATER
NEW ORLEANS SECTION

The Pediatric Recreational Program at Charity Hospital, a project originated and sponsored by the Greater New Orleans Section of the Council of Jewish Women, is now in its fourteenth year. Council continues to provide the Director's salary, supplementary funds as needed, act in an advisory capacity, provides leadership and encourages volunteer participation from their local Section. The Program is designed to care for the social, emotional, ethical and recreational needs of the hospitalized child.

PHYSICAL SETTING

The physical setting remains the same, with a large, attractive, bright Playroom well-equipped with toys, games and recreational material. (W 903—Ninth Floor)

FINANCIAL

The Hospital assumes the responsibility for toys, games and recreational equipment which is replaced and replenished from the budgetary allowance. The Hospital also provides labor for repairs, maintenance, maid service, office supplies, and the assistant director's salary. The Greater New Orleans Section, Council of Jewish Women assumes full responsibility for the director's salary as well as meeting emergency needs as they arise.

VOLUNTEERS

Volunteer participation is essential to the success of the Program. our volunteer roster is a good cross-section of the community, and volunteers are referred from the following sources: Charity Hospital Volunteer Office, Community Volunteer Service, National Council of Jewish Women, New Orleans Section, friends of active volunteers, and friends and families of doctors and the hospital staff. The total number of workers increased appreciably over last year; 221 volunteers participated, which included 98 day workers, 88 spot volunteers and 31 evening workers. They all worked a total of 4606 hours. This is an increase of 58 hours over the previous year. Council volunteers, numbering 22 and their daughters, served 1471 hours.

TRAINING

Volunteer training included orientation for new volunteers and on-the-job training in various phases of the work. In addition to this, six arts and crafts classes were held for day volunteers. In connection with this instruction, professionals from the field of medicine and nursing addressed the groups. Dillard and LSU Student Nurses received training and experience in the recreational field while on Pediatric duty.

ADVISORY AND POLICY COMMITTEE

The Advisory and Policy committee of the Pediatric Recreational Program is comprised of the following people:

Local Council of Jewish Women	President
Local Council of Jewish Women	Vice-President in charge of Community Services
Local Council of Jewish Women	Chairmen of Ped. Rec. Program
Local Council of Jewish Women	Vice-chairman of Ped. Rec. Program
Local Council of Jewish Women	Chairman ex-officio
Charity Hospital	Sister Supervisor of Pediatrics
Charity Hospital	Director Ped. Rec. Program
Charity Hospital	Asst. Director, Ped. Rec. Program

This Committee meets frequently to discuss the on-going program, make policies subject to the approval of the Hospital Administration, and to discuss any problems or changes that will help to continue to foster a high quality operation. This committee is also responsible to interpret the program to the community and the hospital, to assist in training volunteers, to determine unfilled needs and to annually evaluate the Program.

PROGRAM

The daily Playroom and Ward activities are from 9:30 A.M. to 11:30 A.M. and from 2:30 P.M. to 4:30 P.M. Monday through Friday. On Monday and Wednesday evenings the activities are from 5:30 P.M. to 7:30 P.M. The Playroom activities include free play, music, games, arts, crafts and storytelling. In addition to this, the Program has the responsibility for all parties, programs and recreational activities for the entire 9th floor.

Ward recreation includes toy distribution, distribution of record-players, radios, television sets, movies, and bedside supervision of arts and crafts with particular attention to individualized needs. In the summer vacation craft classes for teen-agers were resumed.

PUBLICITY

Publicity for the year included radio, newspaper and TV coverage for Pediatric Recreational activities. This also included radio spot announcements and interviews from the Hospital and Council levels. Visitors touring the hospital have expressed interest in the Program, and have frequently contacted us requesting information and written material pertaining to our Recreational Program.

DONATIONS

We have been very fortunate to have received numerous and generous gifts and contributions from interested friends and organizations. These gifts have been most helpful to the Program and enthusiastically received by the children. 297 contributions were acknowledged this year.

COLLABORATIVE CHILD DEVELOPMENT PROGRAM

The Collaborative Project, as more completely described in the Annual Report of July 1, 1958 to June 30, 1959, is a research project to study how conditions and factors occurring during pregnancy or early neonatal life are associated with certain outcomes of pregnancy such as prematurity, mental retardation, and cerebral palsy. This Project, of which the Charity Hospital unit is a part, is the first large-scale, multidisciplinary effort to collect such information.

Listed below is the number of Charity Hospital patients handled in the various phases of the local program during the past fiscal year.

Obstetrical Patients Registered	492
Prenatal Visits	3530
Total Deliveries	473
Livebirths	456
Stillbirths	10
Abortions	7
Pediatric Patients	1177
Total Pediatric Clinic Appointments	3878
1 month exam	530
2 month exam	509
3 month exam	470
4 month exam	419
6 month exam	456
8 month exam	379
12 month exam	370
18 month exam	392
24 month exam	337
36 month exam	16

This Project is progressing in its efforts to achieve many of its goals and at the present time we are planning for the analysis of certain of the data collected during the past three years. Scientific information from this Project should start becoming available within the coming year.

/s/ R. W. SAPPENFIELD, M.D.

Project Director

MAINTENANCE DEPARTMENT

The Maintenance Department when fully staffed consist of 151 workers. At the present time there are 15 vacancies due to lack of necessary funds.

This department has handled 24,283 written requests for maintenance during the past year. The following figures are given to indicate the volume of work and type of services rendered.

20 renovation jobs completed.
65 serious leaks due to pipe deterioration.
14 major repairs to equipment.
26 pieces of new equipment installed.
1215 pieces of new furniture or equipment manufactured under \$100.00.
71 pieces of new furniture or equipment manufactured over \$100.00.
4327 gallons of paint used.

	Requisitions
Woodwork & Metal work	4980
Painters	2252
Plumbers	4843
Steamfitters	1735
